Another all-too-common Zero Effort Asset Flip from the Unity Asset Store to make a quick buck. Here's the Asst kit they simply purchased and exported up to Steam here as their own game:
<https://www.assetstore.unity3d.com/en/?stay#!/content/29032> Here's my video review:
<https://www.youtube.com/watch?v=MTMyoRPQ4vo> It might be fine for the price, IF the developer actually finished this game, but he didn't. He couldn't even be bothered to put an "EXIT GAME" option anywhere and this forces you to need to force an exit via your windows task manager just to quit the game. Ugh. Also because it's just a base foundation asset kit sold to help a developer learn unity or start making their own game, this has all the common asset kit incomplete game problems such as invisible walls and no achievements or high scores uploaded to Steam. Avoid at all costs. NOT RECOMMENDED.
