Can't recommend in the current state - the ingame controls are completely different to that shown in the input section of the starting window - and the control layout is awful. There is no auto-fire - you have to keep pressing the key to fire, and can't hold it down. What is worse, however, is that there is no joypad support - nor even mouse support. Music is boring too.. Created a steam account just to buy this game. Love it. and the World ranking system is going to make for some great competition. The game play is very addictive. The music and sound effects are great. and the graphics are awesome. Its a smashup of old school retro gaming with a modern flashy polish! Great work. Hah current world ranking is #6.. This is great! Shooty bang bang! Bright lights! Throbbing soundtrack! I seriously love all of the arcadey goodness. https://youtu.be/ajV7yIX0CSM. This is great! Shooty bang bang! Bright lights! Its cool, instantly enjoyable. Its got the retro gameplay and sound but the graphics are more like geometry wars and other spruced up retro shooters. Not a bad thing. Would be really cool on a joystick or gamepad my wrist is getting a workout on the keyboard haha.. Created a steam account just to buy this game. It's Gyruss for the modern age, but with less JS Bach. The game doesn't have controller support (yet) but works well with a keyboard.. Its cool, instantly enjoyable.
